STLY Data is missing

Issue : Client reporting STLY data is missing for April 2023

Whenever you’ve investigating that STLY data is missing the primary check is to see whether the property actually HAD any data populated for the period. Example : Screenshot shows that property does not have STLY data but has STLY19 data.

Sample case

Summary							
March 2023	April 2023						
		Occupancy%	Occupancy	Revenue	ADR	RevPAR	
MID + On Books	62.5	5,810	1,524,839	262.45	163.96		
STLY	—	—	—	—	—	—	—
ST2V	78.0	7,379	1,384,062	187.72	146.38		
ST19	74.2	7,015	1,379,311	196.62	145.88		
MID + Forecast	62.5	5,814	1,528,547	262.89	164.36		
Last Year	84.6	8,003	2,028,429	253.46	214.54		
Two Years Ago	78.1	7,383	1,386,725	187.83	146.67		
2019	75.4	7,124	1,400,496	196.59	148.12		
My Forecast	—	—	—	—	—	—	—
Budget	—	—	—	—	—	—	—

You can simply run a query called “Fetch BDE/CDP data or file names from file_metadata table in **CMA.**”

As of say lets 4th April 2023 – look at data in the column called Snapshot date in the result of the file generated as an outcome of the query executed earlier.

Snapshot_DT would be the column name.

IF the date contains dates like say 29th April 2022 – note that the files to G3 RMS were never present for the property for a period from 4th through 28th April (potentially longer) . In this case it was as far out as 30th Mar 2022.

	E	F	G	H	I	J	K	L	M	N
1	File_Name	File_Location	Property_ID	Past_Window_Size	Future_Window_Size	Scope_Start_DT	Scope_End_DT	Snapshot_DT	Snapshot_TM	Prepared
203	OperaDataLoad	2b535a0-da31-471d-bb5c-ahr9becff4aee	992113	2	560			2022-04-29	17:47:13.0000000	2022-04-29

Consequently – you can check if a site is in Do Not monitor by checking case history and if the site is in Do not monitor -for the given period where STLY is missing – you can advise the client that past data absence leads to non availability of data in current consideration i.e. April 2023. In the example quoted earlier there was actually a [DNM case for the given period](#).

Also Note that given the snapshot DT value in April is only for 29th April 2022 – the STLY data will start showing up in the G3 RMS ONLY after 28th April 2023 BDE processing ,i.e the same date corresponding where the earliest extract is availble for the period of time where extracts were missing , in the case above – column L has dates onwards of 29th April 2022 ONLY – so data would show up if the site processes after 28th April 2023.
