Schedule report failure in delivery

Schedule report failure in delivery

Error:

Tetris Errors: [198 – REPORT_DELIVERY_FAILED – – User.id: null – Workcontext: null] Cause :
com.ideas.tetris.platform.common.errorhandling.ScheduledReportException: Cause : com.jcraft.jsch.JSchException: java.net.ConnectException: Connection timed out: connect Cause : java.net.ConnectException: Connection timed out: connect

If you get the connection error while delivering reports then try to resume once. If error is still persisting, then escalate it to client that we are not able to deliver the reports.

Steps to get the data to escalate it to client

- Open the job log in the failure. Search for Error while executing the report, you will find the name of the report. Note the report name. In this case it is Hilton-340-ALPHH

```
2024-05-16 01:27:54,209 ERROR[JasperREStExecutionService:183] Error in execution for report: Hilton-340-ALPHH
Error Type: REPORT_DELIVERY_FAILED
Step Name: DELIVERY
Error Description: Error while uploading file to SFTP Server
Error Message: com.jcraft.jsch.JSchException: Auth fail
```

- Search for report name which you found in logs. In this case the report name is **Hilton-340-ALPHH** for which we are facing an error.
- Now with all details you need to escalate this to client in below format. The information which you need to put in the email is as below
 - Property code
 - Property Name
 - Report created by user
 - Date and time on which report is created
 - SFTP Details
 - Report name

Hello All

This is to inform you that we are facing the issues while uploading the BDE Scheduled Reports for Home2 Suites by Hilton Daytona Beach Speedway, FL.

Reports were created by user – "Kyra Woodward"

However, our system is unable to upload the reports to SFTP Server - mypsftp.mydigitaloffice.com:22 due to Authentication error.

Could you please verify if the Authentication details (Username and Password) entered for SFTP are correct and the mentioned SFTP host is active ??

Once the above validations are done and FTP server is active - you may trigger the reports using the **Send Now** functionality for reports that may have been missed out due to the below highlighted issue.

.. . . .

- Once you send the email for escalation to client continue the failure. **Do not abandon it.**

Scenario-2

For below error –

=====

Tetris Errors: [199 – REPORT_GENERATION_FAILED – – User.id: null – Workcontext: null] Cause :

com.ideas.tetris.platform.common.errorhandling.ScheduledReportException: Cause : com.ideas.tetris.platform.common.errorhandling.G3ReportGenerationException: net.sf.jasperreports.engine.JRRuntimeException:

com.microsoft.sqlserver.jdbc.SQLServerException: Divide by zero error
encountered.

=====

We should do below –

1) Run query from CMA named “Identify total capacity is zero”

In output we will get occupancy date for which the Total capacity at hotel & Room type level is zero.

2) Share this information to the client via email (example of email in below)

3) Continue the step so that other reports can get deliver.
