Solution for failure in step – FPLOSQualifiedRecommendationStep

Whenever you see failure in step FPLOSQualifiedRecommendationStep of NGI Deferred Delivery Job with below error.

=====

Tetris Errors: [34 – DATABASE_EXCEPTION – executeBatch failed for calculate FPLOS – User.id: null – Workcontext: null] Cause :
com.microsoft.sqlserver.jdbc.SQLServerException: Violation of PRIMARY KEY constraint ‘PK_temp_qualified_fplos_pid_992150_bar_value’. Cannot insert duplicate key in object ‘dbo.#temp_qualified_fplos_pid_992150_bar_value’. The duplicate key value is (2020-10-14, 1).

=====

FPLOS rates are derived from BAR.

We get the above error because it is trying to insert duplicate data in table “Rate_Unqualified_Details” for date 2020-10-14.

How to find the duplicates?

To find duplicates first we should know which Rate_Unqualified_ID is used for that date i.e for 2020-10-14

Query – Select * from Decision_Bar_Output where Arrival_DT=’2020-10-14’

Result –

	Decision_Bar_Output_ID	Decision_ID	Property_ID	Accom_Class_ID	Arrival_DT	Rate_Unqualified_ID	LOS	Override	Floor_Rate_Unqualified_ID	Decision_Reason_Type_ID	Month_ID	Year_ID	CreateDate
1	325891	1211	992150	5	2020-10-14	17	-1	NONE	NULL	1	10	20	2020-10-13
2	326451	1211	992150	3	2020-10-14	17	-1	NONE	NULL	1	10	20	2020-10-13
3	327011	1211	992150	2	2020-10-14	17	-1	NONE	NULL	1	10	20	2020-10-13

For that day Rate_Unqualified_ID = 17 is used.

Now execute the below query on table Rate_Unqualified_Details Table.

Query – Select * from Rate_Unqualified_Details where Rate_Unqualified_ID=17 and ‘2020-10-14’ between Start_Date_DT and End_Date_DT

Result –

Rate_Unqualified_Details_ID	Rate_Unqualified_ID	Accom_Type_ID	Start_Date_DT	End_Date_DT	Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Created_By_User_ID	Create
1	216	17	2	2019-11-14	2021-12-31	65.00000	65.00000	65.00000	65.00000	65.00000	65.00000	28041	2019
2	443	17	8	2020-08-06	2021-12-31	44.00000	44.00000	44.00000	44.00000	44.00000	44.00000	28041	2020
3	444	17	4	2020-08-06	2021-12-31	44.00000	44.00000	44.00000	44.00000	44.00000	44.00000	28041	2020
4	445	17	1	2020-08-06	2021-12-31	44.00000	44.00000	44.00000	44.00000	44.00000	44.00000	28041	2020
5	446	17	3	2020-08-06	2021-12-31	44.00000	44.00000	44.00000	44.00000	44.00000	44.00000	28041	2020
6	447	17	7	2020-08-06	2021-12-31	54.00000	54.00000	54.00000	54.00000	54.00000	54.00000	28041	2020
7	448	17	6	2020-08-06	2021-12-31	54.00000	54.00000	54.00000	54.00000	54.00000	54.00000	28041	2020
8	532	17	8	2020-10-13	2021-12-31	45.83000	45.83000	45.83000	45.83000	45.83000	45.83000	28041	2020
9	533	17	1	2020-10-13	2021-12-31	45.83000	45.83000	45.83000	45.83000	45.83000	45.83000	28041	2020
10	534	17	3	2020-10-13	2021-12-31	45.83000	45.83000	45.83000	45.83000	45.83000	45.83000	28041	2020
11	535	17	6	2020-10-13	2021-12-31	54.16000	54.16000	54.16000	54.16000	54.16000	54.16000	28041	2020

As we can see in above output we have duplicate seasons for Accom_Type_ID 1, 3, 6, 8

For example – Accom_Type_ID 1

Rate_Unqualified_Details_ID	Rate_Unqualified_ID	Accom_Type_ID	Start_Date_DT	End_Date_DT	Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Created_By_User_ID	Create
1	445	17	1	2020-08-06	2021-12-31	44.00000	44.00000	44.00000	44.00000	44.00000	44.00000	28041	2020
2	533	17	1	2020-10-13	2021-12-31	45.83000	45.83000	45.83000	45.83000	45.83000	45.83000	28041	2020

1st season is starting from 2020-08-06 and ending on 2021-12-31.

2nd season is starting from 2020-10-13, here the 2nd season is starting before the 1st season ends.

So there is overlapping between 1st season and 2nd season. The over lapping data is considered as duplicate data which needs to be corrected.

After investigating and successfully getting the duplicate data please contact your TL or any M Escalation team member so that we can get it corrected from QA.
