Support Teams – Deployment Items Handover

Hello Team,

This document will provide you with the latest G3 bug fixes and enhancements that are taken up by the development teams in the latest release.

All these items are part of a discussion meeting and handover that happens prior to the release. The agenda of the meeting involves with the technology team sharing important information of the upgrade items that are directly impacting support operations.

Please go through the video links shared at the end of the release items which will give you the various Q&A discussions points during the handover meetings.

Deployment Handover 5.1.3

US35716 – Alert care if decision delivery has exceeded some amount of time – DEMO

DE6344 – Prod2: OXI decision outbound is not picking correct conversion factor – Inform

US36062 – set throttle for Opera Data Load to 50 – RegulatorServiceThrottle.OperaDataLoad – Inform

US35602– OXI PMS – Add Threshold for Processed Messages during Installation – DEMO

Vide0 – [Link](#)

Deployment Handover dated 16th July 2018

DE6636 – Change in steps sequence in NGI catchup so that Booked Data backfill get executed correctly. – Demoed by Mandar Bedekar. The sequence of steps changed that will result in correct execution now.

DE6580 – Fix criteria for non-plural collections that end in s – Demoed by Sahil.

DE6557 – OXI Installation – If HISTORY_FORECAST report is uploaded again then it starts with Room type request even though Room types are already present. Currently as of 10th July2018 – if History forecast report is uploaded again – room type requests are re-issued. This was demoed by Juan. Post the deployment – this will cease. Plus, if someone wants to request room types again – they will have to do this manually instead.

US36581 – G3 UI/Service: Migration of SAS New Feature Parameters ‘use_book_data’ and ‘grp_blk_bkcrv’ to IP_CFG_attribute table. This was for ROA.

US36661 – Increase the throttle for Purge jobs to 25. Currently this is set at 5 pre-deployment – but will change to 25 to ease data purges.

US35772 – OXI PMS – Remove Check on RESERVATION msgs with mfupdateDate after Checkout

Vide0 – [Link](#)

Deployment Handover dated 1st August 2018

US25835: Tracking of decision upload date/time moved to tenant table for each external system.

DE6263: Prod2 – Purge Property Data fails in [purgeForecastAndDecisionDataStep] due to transaction timeout

Going to delete a limited set of data compared to previously.

US36314: OXI PMS – Revise RTAV Processing & Validation

US36907: OXI PMS – Handle the booked Room Type correctly when it not available in STAY messages

US36997: Allow CCFG to run immediately whenever UI is unlocked

DE6683: OXI Decision Upload Fails With Authentication

US37051: Invoke Tenant Purge in BDE Post Processing job. Slowly will be rolled out to production clients.

Deployment Handover dated 22nd August 2018

US35709 – Pace Backfill Step should send the summary of execution in response rather than adding it in SAS log only.

Rest Call to Unpark Messages Does Not Unpark ALLOTMENT messages – Atul and team have fixed this defect.

RebuildFromRaw – skip sufficient pace check to allow create FG to run : Sandeep demoed this – once enable – data sufficiency precheck prior to CCFG will be skipped for such a property.

Change the separator for room revenue packages in vendor config to be pipe instead of comma. Demoed by Jeff.

Upgrade Opera Agent to Tomcat 9.0.10, Java 8, and includes updated time zone database 2018e.

1. If property needs newer time zone requirement, then agent should be upgraded.
2. Includes support of TLS 1.2

Support Handover 5.3.3

Thursday, November 8, 2018

[http://sww.sas.com/blogs/wp/knowledgeuniverse/videogallery/g3-support-handover-5-3-3/WebEx Recording](http://sww.sas.com/blogs/wp/knowledgeuniverse/videogallery/g3-support-handover-5-3-3/WebEx%20Recording)

DE6820 – HTNG – multiple statcorrelation IDs are created if stat messages are received at the same time.

US32905 – VendorConfig – Nucleus – Refactor to use new config service

US37570 – OXI PMS: Migrate to new Integration Setting services

US38138 – OXI PMS – Handle Missing fields in Reservation Packages

US38661 – Pace Backfill – additional validation criteria to determine with STAY RT pace should be generated in Tenant

US38867 – Add Throttle for BDEPostProcessingJob
US34594 – Hilton\ESA : Populate Reservation_nights Directly without going through Instead Of Trigger
US38414 – Ratchet – additional tables for purge
US38404 – Hilton ACK processing enhancements
US38515 – MINLOS Decision Upload failures due to shorter RTAV count
US38691 – Move property specific task from Global.Remote_Agent_Tasks to tenant
DE7228 – operaTransformSummaryDataStep fails with timeout in perf tests
