“FOLS Processing Not Automatically Triggered”

Hello Team,

Objective:

This document outlines the troubleshooting steps to follow when FOLS processing is not automatically triggered, even after receiving the file, and the files are stuck in the Incoming folder.

1. Confirm Receipt of the File

- When encountering an exception for FOLS in the MBE screen, first check if the file has been received.
- Use the following link to confirm if the file has been received:
[Check Incoming Files](#)
- Navigate to **Incoming** > select the year and month > select **ACCORHG** > and then select the relevant property code.
Example URL:
[Incoming Folder](#)
- Confirm whether the file has been received for the specified property.

2. Auto Email Not Triggered

- If the file is not present in the Incoming folder, an automatic email should be triggered.

- If the auto email has not been triggered, send a manual email and escalate to the M Team, informing them that the auto email was not sent.

3. File Received, But Processing Not Triggered

- If the file has been received but the processing has not been automatically triggered, follow the steps below to resolve the issue.

4. Check for Failed Jobs

- Verify if there are any failed jobs associated with the property.
- If any failed jobs are found, they must be addressed first before proceeding with further troubleshooting.

5. Check for In-Process Files

- If no failed jobs are found, check if any files are in the In-Process state by performing the following REST call:
[In-Process Files Check](#)
- Replace the property code in the URL with the relevant property code and hit the REST call.

6. Review File and Correlation ID Status

- Review the file name and the correlation ID status.
 - Check whether the status is **Successful** or **In Progress**.

7. Check In-Process Folder

- Search for the file name in the In-Process folder.
[In-Process Folder](#)
- Confirm whether the file is present in this folder.

8. Escalation to M Team

- After completing the above checks, if the issue persists, escalate the matter to the M Escalation Team for further investigation.
