dailyBarChunkedDeliveryStep Failure: “Rate amount inconsistency within room category”

You may observe HTNG Decision Delivery Job failures in dailyBarChunkedDeliveryStep (mostly for Curtis C) with the following Error in the response;

- <Error Type="3" Code="450" ShortText="Rate amount inconsistency within room category STD for date 2018-06-10" />

Ranjit on Accor Client Handling Process Guide

2.

2. To identify the Overrides

1. Go to Decisions Tab

1. Continuous Pricing Management

1. Filter the start date to a date earlier than the affected date in the error.
- 2.

Click the 'Filter' button to get the results.

3.

4. look for the affected date.

1. Check if any BAR override is placed there.
2. If yes, click on the ' icon to view the override detail.

3. To identify the BAR rounding Rule.

4.

Now, when you have all the above details with you, you need to see if the Overrides conform to the BAR rounding rules.

In this case, you can see that the override is set to 103.80, which is against the set BAR rounding rule which states that the 1/10 and 1/100 (i.e 0.0 and 0.00th decimal should be in the value of 0) Here it is .80 (103.80)

Also, if you see that the Ceiling Override is lower than the Floor override.

Considering the Above, you need to advise the client to review their override changes to address the failure.
