zero capacity Component room issue

Nature of the issue:

Notice F1K shows up in the zero capacity room type list despite the PMS configuration showing that its NOT a Component Room (CR).

Typically you should check the following tables for these entries

```
select * from Accom_Type
select * from Accom_Class
select * from CR_Accom_Type_Mapping
select * from CR_Accom_Type_Mapping_History
```

You should make sure that things line up per the comments in the outcomes in the queries executed above.

In this case the configuration of the Accom Type matches the G3 configuration (which you should check).

Run the query from the Run SQL module

Query to check FROM CR_PROBABLE_ACCOM_TYPES

It is a simple query and its as follows

```
select * FROM CR_PROBABLE_ACCOM_TYPES;
```

In this case F1K was showing up as an entry which was no longer relevant.

CR_PROBABLE_ACCOM_TYPES_ID	Property_ID	Accom_Type_Code	Configured_As_CR
1	991976	PF	false
2	991976	PM	false
3	991976	JS3B	true
4	991976	DS3B	true
5	991976	F1K	false

Notice its Accomtype ID is 5 , we used that to delete it and that resolved the issue.

```
DELETE FROM CR_PROBABLE_ACCOM_TYPES WHERE
CR_PROBABLE_ACCOM_TYPES_ID =5;
```

This is the outcome post the deletion

CR_PROBABLE_ACCOM_TYPES_ID	Property_ID	Accom_Type_Code	Configured_As_CR
1	991976	PF	false
2	991976	PM	false
3	991976	JS3B	true
4	991976	DS3B	true

Refresh the screen and now F1K is no longer present

K is no longer present on the screen.
